### **DETAILED ACTION**

This is a Restriction and an Election of Species for application number 10/783,803 Mounting Frame and Mirror Assembly for Flat Panel Display filed on 2/20/04. Claims 1-8 are subject to restriction.

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-7 drawn to a mounting frame and mirror, classified in class 248 subclass 475.1.
- II. Claim 8 drawn to a method of the viewing of a flat panel display and viewing a projected image, classified in class 359 subclass 443.

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the product of a mounting frame and mirror could be used in a materially different process, such as using the device to view patrons of a retail fitting room.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to Richard Goldstein on 2/14/05 to request an oral election, but did not result in an election.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
